

Want to explain to this guy why he had to dig up the ground rods you sold him because they didn't meet code?

Stock UL-Listed Galvan ground rods and you won't have to.

Only Galvan Industries offers you hot-dip galvanized ground rods that are UL-Listed to meet the strictest interpretation of the NEC code, just like our copper bonded rods. Most other galvanized rods aren't up to NEC standards. **Made in the USA**, Galvan's **UL-Listed** copper and Gold Series™ galvanized ground rods are second to none in drivability, long life and code compliance. Don't wait until there's a problem. Make the move to Galvan ground rods today.
