

SOLID GROUND

GALVAN INDUSTRIES is the only manufacturer in North or South America with in-house production of all three types of ground rods your customers demand; hot dip galvanized, copper clad and stainless steel.

GALVAN INDUSTRIES' superior quality ground rods feature chamfered drive ends, conical points and are available in various lengths and diameters, including rods that meet new ANSI-approved NEMA specifications.

GALVAN INDUSTRIES has been a major supplier of ground rods and accessories for more than 30 years. For quality and availability, now's the time to make Galvan your #1 source for grounding and connecting products.
