Here are 95 reasons you should stock our IBBZ and IBBCU.

Galvan’s IBBZ (zinc) and IBBCU (copper) intersystem bonding bridges should be in your inventory. Here’s why:

#1. Low cost (especially on IBBZ)
#2. Easy to install
#3. Snap-on cover matches meter and conduit
#4. Code compliant to NEC 250.94
#5. UL listed in US and Canada
#6 through 95: Special 90-day terms!

Call Galvan today to find out more!
Galvan Intersystem Bonding Bridges

- Meets NEC 250.94 for Intersystem Bonding Termination
- Used in residential and commercial applications to ground up to four (4) systems to a single location
- For protection of cable, telephone, satellite, internet, security and other systems
- Lay-in style connection for up to four auxiliary ground wires
- Available in die-cast zinc or copper alloy
- Approved for use with solid or stranded copper conductors
- Assembled with stainless steel screws and plastic cover
- Plastic cover snaps on, providing protection and an easy, aesthetically pleasing installation.
- UL Listed for US and Canada
