

GET THE ORDER WITH GALVAN

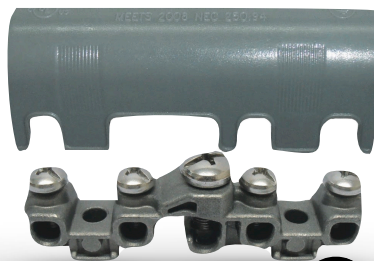

It's easy to sell Galvan's most popular products. They have advantages that competitors can't match. Use the notes below to make the most of your sales opportunities!

G-5 and SRC Grounding Clamps

Most acorn ground rod clamps are **NOT** listed for galvanized or stainless steel ground rods. Galvan G-5 and SRC clamps are listed for copper, galvanized, stainless, and rebar.

Key selling proposition: "I can sell you a clamp that is UL-listed for copper-coated, galvanized and stainless steel ground rods, and rebar, for the same cost as that other clamp that's only listed for copper-coated rods."

IBBZ Intersystem Bonding Bridge Connectors

Galvan's **low-cost** IBBZ meets all requirements for **NEC 250.94** for Intersystem Bonding Termination of up to four systems. Its protective plastic cover snaps into place.

Key selling proposition: "I can sell you a cost-saving intersystem bonding bridge that is quicker and easier to install. There is no cover screw to lose in the field and the color matches the panel board."

Galvan UL-Listed Galvanized Ground Rods

Our UL-Listed hot-dip galvanized ground rods **meet all requirements of the NEC code**, not just length but also diameter, which can't be accurately measured without proper equipment.

Key selling proposition: "I can sell you a UL-listed galvanized ground rod that you know is fully code-compliant for the same cost as that non-listed rod."
